

BRIOCEAN

BEYOND COMPONENTS

Asia's leading sourcing partner for global supply chains

ABOUT BRIOCEAN

Established in 2008 and headquartered in Singapore, Briocean is a distinguished independent distributor of electronic components, providing strategic sourcing and integrated supply chain solutions to manufacturers across diverse industries.

Through a robust global network and rigorous supplier qualification, we address critical procurement challenges—shortages, cost optimization, and supply continuity—with agility and precision. Our two quality assurance centres in Shenzhen and Hong Kong enforce end-to-end traceability, ensuring every component meets the highest standards of authenticity, reliability, and performance. Quality defines our operations.

Independent rankings consistently affirm our industry leadership: in 2023, 8th on Supply Chain Connect's Top APAC Distributor List; in 2024, we earned simultaneous recognition on both the Top 50 Global Distributors (Supply Chain Connect) and the Top 25 Global Independent Distributors (ESNA).

SERVICES

Supply Chain Stability

Proactively monitor supply dynamics and maintain strategic buffers to keep your production running—no matter the market conditions.

Credit Flexibility

Up to US\$200M facility for 1,000+ clients with favourable terms, rapid multi-currency approval (USD/RMB), no upfront payment required, accelerating your time-to-market.

Fast Delivery

Our express lead times backed by global logistics hubs enable same-day dispatch and 24/7 expediting to significantly accelerate your time-to-market.

Lifecycle & Inventory Optimisation

Manage obsolescence, reduce costs, and resolve excess inventory to ensure business continuity, drive savings, and maximise ROI – all through strategic sourcing and inventory expertise.

4-TIER QUALITY INSPECTION PROCESS

Briocean meticulously inspects, verifies, and tests each component to ensure that it meets the required quality standards, beginning with the label and packaging. It is our responsibility to ensure the quality, reliability, and excellence of each component we source for our manufacturing clients.

Our multi-tiered inspection process allows Briocean to source high-quality electronic components that are authentic.

SUPPLIER MANAGEMENT

Brioclean has developed a professional and systematic Supplier Management System (SMS) to assess the reliability of our suppliers and ensure quality in the procurement and delivery processes. With the aid of a comprehensive and scientific database, we conduct regular assessments to effectively track the performance of our suppliers in terms of delivery, quality, and stability, as well as to identify relevant supplier risks in a timely manner.

Suppliers will only be listed in Brioclean's Supplier Management System once they have passed the auditing process. Brioclean then implements the classification-based supplier management method by categorising and grading its suppliers.

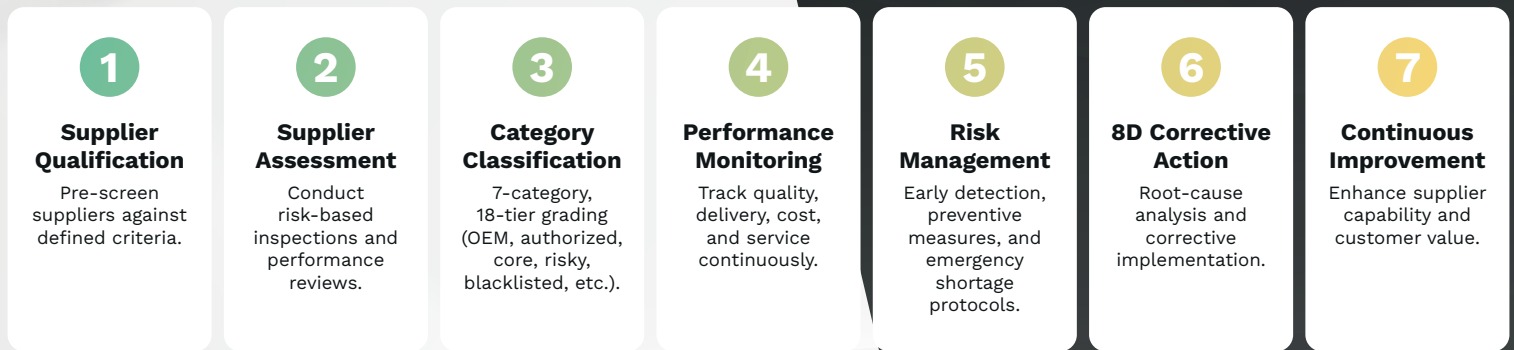

LTDC

LEADS TO DELIGHTED CUSTOMERS

A disciplined framework linking supplier governance to customer trust.

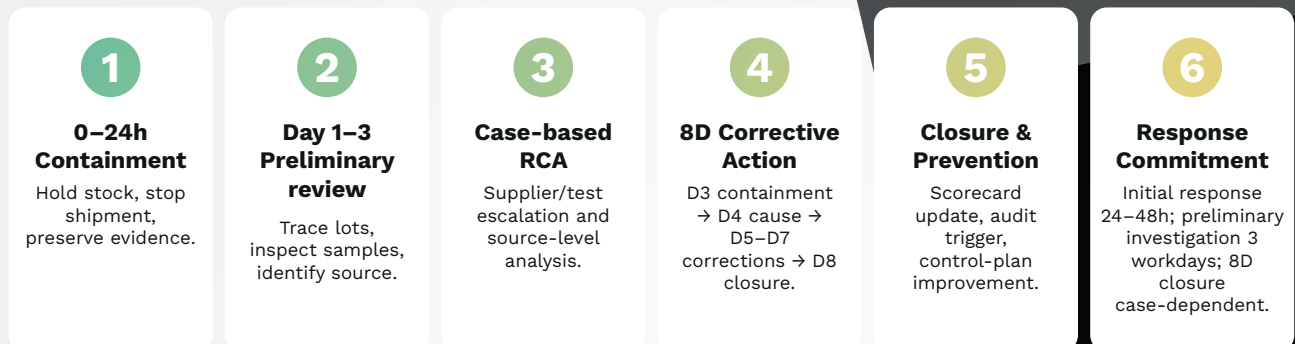

SUPPLIER GOVERNANCE

We qualify, evaluate, and manage suppliers for reliability.

CUSTOMER ENGAGEMENT

We respond, resolve, and improve to earn lasting trust.
